- Database Management
- HTML/CSS
- Python/Django
- React
- JavaScript
- GitHub: <https://github.com/Marvel2410>

CAREER FOUNDRY FULL STACK PROJECTS

My Flix Movie API

- Developed a responsive single-page web application for movie enthusiasts, offering a rich and interactive user experience.
- Initiated the project by developing a RESTful API using Node.js and Express.
- On the server-side, the API interacts with a MongoDB database, employing CRUD methods for data retrieval.
- On the client side, utilized React and React-Redux to craft various views such as single movie view, login view, registration view, and profile view.
- Successfully created Flix List Movie App, providing a seamless user experience and showcasing proficiency in full-stack JavaScript development.
